Each cell is 6 x 6 inches square. 72 cell panels are taller by 12 inches. The average solar panel is 5.4 x 3.25 feet or 65 inches by 39 inches. The average weight is 40 lbs. Average depth is 1.8 inches. Portable solar panels are smaller, often half the size of regular solar arrays. There are 3 standardized sizes of solar panels, namely: 60-cell solar panels size. The dimensions of 60-cell solar panels are as follows: 66 inches long, and 39 inches wide. That's basically a 66x39 solar panel. But what is the wattage? That is unfortunately not listed at all. 72-cell solar panel
