

Argentina installs energy storage batteries

The Argentine Energy Secretariat, which is part of the Ministry of Economy, has launched an international call for proposals seeking to add 500 MW of battery energy storage system (BESS) capacity in critical nodes in the so-called Metropolitan Area of Buenos Aires. The Argentinean authorities plan to install the new storage capacity in critical nodes of the metropolitan area of Buenos Aires, with an estimated investment of \$500 million and an execution period of between 12 and 18 months. From pv magazine Latam

The Argentine Energy Secretariat, which is part of the Argentine Energy Secretariat, has received significantly more bids than expected for its public call to install large-scale battery energy storage systems (BESS) in the Buenos Aires metropolitan area (AMBA). Although the tender aimed for 500 MW, the AlmaGBA procurement drew proposals totaling 1.3 GW. The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure. Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of international attention with its first large-scale battery energy storage tender. Designed to reinforce the grid in the greater Buenos Aires area, the initiative has sparked significant interest--receiving more than 1.3 GW of bids. Argentina has taken a major step toward modernizing its energy infrastructure with the launch of a 500 MW battery energy storage system (BESS) tender under the AlmaGBA program. Aimed at enhancing grid reliability in the metropolitan area of Buenos Aires (AMBA), this \$500 million initiative marks a significant milestone for Argentina's power sector.

Argentina has launched a 500 MW battery energy storage auction to strengthen the electricity grid in Buenos Aires' metropolitan area (AMBA). With an estimated US\$500 million investment and an execution timeline of 12 to 18 months, the project aims to enhance energy reliability, particularly during peak demand periods. Argentina launches 500 MW storage auction. The Argentinean authorities plan to install the new storage capacity in critical nodes of the metropolitan area of Buenos Aires, with an estimated investment of \$500 million and an execution period of between 12 and 18 months. Argentina's oversubscribed BESS tender draws record-low bids. The Argentine Energy Secretariat has received significantly more bids than expected for its public call to install large-scale battery energy storage systems (BESS) in the Buenos Aires metropolitan area (AMBA). Argentina Receives 1.3GW of BESS Proposals for First-Ever 500MW Energy Storage. The initiative aims to deploy 500 MW of battery energy storage systems (BESS) in the Greater Buenos Aires Area (GBA), but the submitted capacity has far exceeded the target. Argentina receives 1.3GW bids for first energy storage tender. Argentina has received more than 1.3GW of energy storage applications for its first battery energy storage system (BESS) tender. Argentina launches 500 MW storage auction. The Argentinean authorities plan to install the new storage capacity in critical nodes of the metropolitan area of Buenos Aires, with an estimated investment of \$500 million. Argentina's oversubscribed BESS tender draws record-low bids. The Argentine Energy Secretariat has received significantly more bids than expected for its public call to install large-scale battery energy storage systems (BESS) in the Greater Buenos Aires Area (GBA), but the submitted capacity has far exceeded the target.
