

What is Bess & how will it impact Bangladesh? With Bangladesh's electricity demand expected to reach 32 gigawatts (GW) by , the introduction of BESS is seen as a crucial advancement for modernizing and stabilizing the national power grid. BREB, having nearly achieved universal electrification, will use this project to provide more reliable power, especially during peak demand periods. Is energy storage regulated in Bangladesh? For example, the Bangladesh Energy Regulatory Commission (BERC) Licensing Regulations do not include rules for licensing of energy storage technologies (except for pumped storage). The institutional framework for the procurement and deployment of such projects is well established in the country. How much energy storage does Bangladesh need? 120GW of RE generation. If a similar ratio were to be considered for Bangladesh's short-term RE aspirations (~1GW in the next three years), the resulting energy storage requirements would amount to 250MW/ 500MWh of energy storage. How much storage capacity will be provided by Bess system? The BESS system, which will be deployed in four Power Distribution Societies (PBSs)-Dhaka PBS-1, Narsingdi PBS-1, Mymensingh PBS-2, and Kishoreganj PBS-will deliver 8 MW of storage capacity in each PBS, totaling 32 MW as a pilot basis Project. When does Barisal power plant in Bangladesh start production? The Barisal Power Plant in Bangladesh is connected to the grid for power generation and put into production on Oct 29. The Barisal Power Plant in Bangladesh, invested in and operated by POWERCHINA, was connected to the grid and started production, with all systems running smoothly, on Oct 29. What is the financial model for EV-Bess deployment in Bangladesh? The current financial model for EV-BESS deployment in Bangladesh relies on a service payment to EV-BESS projects. This payment model does not create bankable projects due to the lack of any long-term fixed revenue streams. However, additional commercial revenue streams may be leveraged to improve commercial viability of these projects.
