The risk posed by an open rack battery is lethal (High voltage or arc blast) and hence access should be restricted only to authorized personnel. Are battery cabinets safe? Authorized personnel must be trained in battery safety. Battery cabinets must enclose the batteries behind locked doors accessible only to authorized personnel. As long as the cabinets are kept locked, they can be located in a computer room or other rooms accessible by non-battery technicians. Can a battery be installed in a computer room? Sometimes they are installed in the same room as the UPS (i.e., electrical equipment room). Local or regional codes may dictate whether batteries are permitted in an electrical room. Smaller UPS systems (e.g, up to 250 kVA) are commonly installed directly in the computer room along with their respective battery cabinets. Are open rack batteries safe?
