

## Belize Power Generation and Energy Storage Project

The new Belize Energy Resilience and Sustainability Project will deploy state-of-the-art battery energy storage systems across four strategic locations in the country, marking a significant step forward in modernizing Belize's energy infrastructure and reducing its dependency on Washington, D.C., February 5, - The Government of Belize, in partnership with the World Bank and the Government of Canada, announced the launch of a new energy project aimed at strengthening the country's power supply and improving the reliability of its electricity services. The \$58.4 million Belize launches new energy initiative to enhance power reliability and boost renewables BELMOPAN, Belize (CMC) -- Belize has launched a new energy project aimed at strengthening the country's power supply and improving the reliability of its electricity services. The US\$58.4 million initiative, in Belize has announced the launch of a new US\$58.4 million energy project aimed at improving the country's power supply and reliability. The new Belize Energy Resilience and Sustainability Project is being funded through a partnership with the World Bank and the Government of Canada. The World Bank Belize Electricity Limited (BEL) and Blair Athol Power Company Limited (BAPCOL) are proud to announce the signing of a landmark Power Purchase Agreement (PPA) for the development of a 15 MW utility-scale solar plant with a 1.5 MW / 3 MWh Battery Energy Storage System (BESS)1, which will be located The Government of Belize, in collaboration with the World Bank and the Government of Canada, has launched a new energy project designed to enhance the country's power supply and improve electricity service reliability. The \$58.4 million initiative aims to optimize consumer costs and increase the The Project will strengthen the reliability and resilience of the national electricity system and enable greater renewable energy integration via the installation of four 10 MW Battery Energy Storage Systems (BESS). The Project is also focused on strengthening the electricity system's operational Belize Launches New Energy Project to Enhance Power The new Belize Energy Resilience and Sustainability Project will deploy state-of-the-art battery energy storage systems across four strategic locations in the country, marking Belize launches new energy initiative to enhance The new Belize Energy Resilience and Sustainability Project will deploy state-of-the-art battery energy storage systems across four strategic locations in the country, marking a Belize Advances Solar Power Plans with Major Utility Project Set The deal paves the way for the construction of a 15-megawatt (MW) utility-scale solar plant with a 1.5MW battery energy storage system in the northern Corozal District. Belize announces major US\$58.4M energy project to enhance Belize has announced the launch of a new US\$58.4 million energy project aimed at improving the country's power supply and reliability. The new Belize Energy Resilience and BEL and BAPCOL Sign Historic Power Purchase Agreement This marks a pivotal moment for Belize as we move toward a more sustainable and resilient energy future. The project reinforces our shared commitment to providing Customers with Belize to add 40 MW of energy storage with World Bank, Canada Belize unveiled a USD-58.4-million (EUR 56.5m) project to deploy 40 MW of energy storage capacities across four sites with support from the World Bank and the Government of Belize partners with World Bank on new \$58M With no new generation capacity
