

Cambodia's energy storage exports

For decades, Cambodia's high economic growth has been fueled by strong garment exports, supported by tourism. However, a new trend in the country's exports has emerged in the past two years - a sharp increase in electrical and electronics (E& E) manufacturing products, particularly solar panels. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country. Some of these energy sources are used directly while most are transformed into fuels or This chapter should be cited as: Theangseng, H. (), 'Cambodia Country Report', in Kimura, S., H.
