Plug the 8-pole connector of this communication cable into the COMM IN socket on the next battery module. Lay the communication cable over the DC cable. Incorporate the rest of the battery modules into the communication cabling within the battery cabinet, working from top to bottom. Plug the 6-pole connector of the communication cable from the supplied APU connector set into the BAT COM socket on the battery management system. Plug the 8-pole connector of this communication cable into the COMM IN socket on the uppermost battery module. Lay the communication cable over the DC cable.

The Eaton®; Samsung Gen 3 Battery Cabinet provides power for energy storage and emergency backup power for the Eaton Uninterruptible Power Supply (UPS) systems to enhance the usability and reliability of the systems. The batteries are housed in a single free-standing cabinet. The battery cabinets Telecom battery backup systems ensure uninterrupted communication during power outages. Their importance grows as connectivity demands increase, especially in critical locations like data centers and mobile cell sites. Uninterrupted power is paramount for communication networks. A service Read the manual thoroughly and understand all of the instructions, cautions, and warnings before using this equipment. If any section of the manual is not understood, contact your nearest authorized dealer, or contact Generac Customer Service at 1-888-436- (1-888-GENERAC), or with any questions
