

## Construction of a solar plant energy storage project in Portugal

Global energy storage platform provider Powin LLC and Galp, Portugal's leading integrated energy company, have partnered to install a utility-scale battery energy storage system (BESS) at one of Galp's solar power plants near Alcoutim, a small village in the country's sunny southern region of the Algarve, where Galp operates several projects with a combined capacity of 144 MW.

Portugal's Renewable Sector Attracts Larger Investment as Storage The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage technologies into large-scale solar projects. Galp and Powin to build large-scale energy storage system in Portugal The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy's value.

Spain & Portugal: Galp Breaks Ground on 147MWh Grid-Forming Galp has kicked off construction on five new battery energy storage system (BESS) projects in Spain and Portugal, marking a major step in its clean energy strategy. According to GALP announces 'solar energy storage projects' in Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store solar energy in Spain and Portugal. Galp and Powin to deploy 20MWh BESS at PV plant in Portugal, Powin's first in Europe. Powin, Galp to install 5 MW/20 MWh of battery Global energy storage supplier Powin LLC and Portuguese integrated energy company Galp have partnered to install a utility-scale battery energy storage system (BESS) in Algarve, Portugal 20 Biggest Solar Projects in Portugal The first of a series of four solar energy plants connected to a major project run by Southern European firm Solaria, the Mendo Marco plant was inaugurated in May and is located in Alentejo. Galp and Powin launch 5MW battery storage Portuguese energy firm Galp and Powin, a US-based energy storage integrator, completed the commissioning and injected the first electrons of stored energy to the grid from a utility-scale battery energy Photovoltaic solar energy is driving the energy transition in Discover how Portugal is promoting solar photovoltaic energy with major projects, grid challenges, and new technologies in its energy transition. Galp and Powin to build large-scale energy storage Image of Galp's solar power plant with rendering of Powin's new battery installation. The 5MW/20MWh system will help Galp to adapt its solar power production profile to its energy needs.
