

## Croatia Solar Communication Base Station Project

---

An EU-funded project in Croatia is working to slash emissions in the telecoms sector by implementing cooling and solar power solutions at telecom base stations around the country. An EU-funded project in Croatia is working to slash emissions in the telecoms sector by implementing cooling and solar power solutions at telecom base stations around the country. Implemented by telecoms operator A1 Hrvatska and funded under the EU's LIFE programme, the LIFE4GREENBROADBAND project To decouple the telecommunications network's future growth from rising GHG emissions, it is necessary to: (i) demonstrate energy efficiency and renewable energy technologies in the network; (ii) raise awareness about the need to reduce GHG emissions in this sector; and (iii) propose optimal and The Croatian Ministry of Environmental Protection and Green Transition has initiated a procedure to determine the need for an environmental impact assessment for the planned 99 MW solar power project Boksic, which includes a battery energy storage system. The annual electricity production of the Croatian Prime Minister Andrej Plenkovic (2nd R, Front) and Chinese Ambassador to Croatia Qi Qianjin (2nd L, Front) visit the construction site of the Korlat solar project in Korlat, Croatia, on May 15, . (Xinhua/Li Xuejun) The groundbreaking ceremony for Croatia's largest photovoltaic power Launching in March , the Solar Flex event in Zagreb will be the partnership's flagship initiative, a platform that will focus on sharing best practices from across Europe to find solutions to enhance the grid flexibility, remove barriers and accelerate solar deployment in Croatia and the wider Acciona Energ&#195;&#173;a, the Spanish energy developer, has secured a 12-year contract for difference (CfD) to develop the 189 MW Promina solar project in southern Croatia. The project, located in Sibenik-Knin county, is set to become the largest solar farm in the country upon its completion in . The Project cutting emissions in Croatian telecoms sector named as An EU-funded project in Croatia is working to slash emissions in the telecoms sector by implementing cooling and solar power solutions at telecom base stations around the LIFE4GREENBROADBAND - Reducing CO2 It will seek to achieve this through implementing energy efficiency and renewable energy measures, so as to reduce energy consumption, increase the use of RES and reduce the CO2 emissions of base LIFE4GREENBROADBAND, Croatia project selected as a finalist Project co-financed by LIFE program LIFE4GREENBROADBAND with the focus of reducing CO2 emissions in telco sector by implementing free cooling and solar power solutions has been Project underway for 99 MW Boksic solar plant The project's site is near Boksic, in the Durdenovac municipality in Osijek-Baranja County. The solar power plant is planned to occupy about 123.8 hectares of land, with photovoltaic panels covering about 46 hectares. Chinese-built Croatia's largest solar power project The groundbreaking ceremony for Croatia's largest photovoltaic power project, to be constructed by Chinese companies, was held Thursday in Korlat. Zagreb Solar Communication Base Station FactoryApr 29, &#183; Over three and a half years, the project installed solar plants at 155 base transceiver stations (BTS) and indoor free cooling solutions at 200 BTS locations across Acciona Energ&#237;a, Promina, Croatia, CfD, solar project, renewable Acciona Energ&#237;a has won a 12-year CfD for the 189 MW
