

Côte d'Ivoire solar Module Project

The first solar power plant in Côte d'Ivoire supplies electricity for 35,000 homes. The solar power plant is regarded as a model project for the expansion of solar energy in Côte d'Ivoire. It is an important contribution to the fight against climate change and a decisive step towards increasing renewable energy production in the country.

JC Mont-Fort wins 50 MW solar concession in Côte d'Ivoire On December 2, 2019, JC Mont-Fort's Ivorian subsidiary, Katiola Solar Power, signed a landmark concession agreement with the Government of Côte d'Ivoire to implement a 50 megawatt peak solar power plant in the Katiola region. This project is part of the government's Solar Plan, which aims to develop 12 new solar power plants with a total capacity of 678 MW by 2025.

Côte d'Ivoire launches an ambitious solar energy strategy, planning 12 new photovoltaic plants to add 678 MW by 2025. Learn about this major renewable push. InfraCo Africa invests to develop a 50MWp solar power plant in Côte d'Ivoire. As a PIDG company, InfraCo Africa is committed, along with its partner Africa Via, to promoting the development of resilient infrastructure in Côte d'Ivoire and contributing to the achievement of national sustainable development goals.

Infinity Power to build two 80MW solar projects in African renewable energy company Infinity Power has signed two concession agreements with the Government of Côte d'Ivoire for PV projects with a total capacity of 160 MW. The projects are located in the Katiola and Tchologo regions. The first project, a 80MWp Kong Solaire project, has been officially launched. It will eventually meet the electricity needs of up to 240,000 people under a 25-year concession agreement.

Côte d'Ivoire Launch New Solar Plant, Illuminates 35,000 Homes Côte d'Ivoire has taken a significant leap forward in renewable energy with the launch of a new solar power plant capable of lighting up to 35,000 homes. This innovative project, located in Boundiali, is part of the government's Solar Plan, which aims to develop 12 new solar power plants with a total capacity of 678 MW by 2025.

50MWp Kong Solaire project to help attain Côte d'Ivoire's 45% renewable energy target Kong Solaire has been co-developed by the Private Infrastructure Development Group (PIDG), through its project development solution, InfraCo, and Ivorian developer Africa Power. The project is expected to be completed by 2021 and will generate 50 MW of solar power.

Côte d'Ivoire plans 678 MW of solar by 2025 Côte d'Ivoire plans to build 12 solar plants by 2025 with a combined capacity of 678 MW and targets 1.69 GW of renewable energy capacity by 2030. The government is committed to increasing the share of renewable energy in the country's electricity generation mix.

Côte d'Ivoire: 50MW solar plant launched to drive energy transition The 50MWp Kong Solaire project in the Tchologo region of Côte d'Ivoire has been officially launched. It will eventually meet the electricity needs of up to 240,000 people under a 25-year concession agreement. The project is part of the government's Solar Plan, which aims to develop 12 new solar power plants with a total capacity of 678 MW by 2025.

Côte d'Ivoire: PPP solar energy project gets the green light Côte d'Ivoire has approved the construction of a \$60 million solar power plant in Katiola, aiming to produce 85,934 megawatt-hours (MWh) annually. This initiative is part of the government's Solar Plan, which aims to develop 12 new solar power plants with a total capacity of 678 MW by 2025.
