

## Estonia to build 500 MW of solar

Estonia added 513 MW of new solar capacity in 2023, a record for a single year, according to Eesti Taastuvenergia Koda. The total significantly exceeds the 282 MW installed in 2022, bringing Estonia's cumulative solar capacity to 1,325 MW, the association reported. Enefit Green currently has a portfolio of 38 solar projects in Estonia and Poland. Image: Enefit Green. Enefit Green has confirmed the final decision on the 74MW Sopi solar PV project in Estonia, into which it will invest approximately EUR44 million (US\$47 million). The investment is part of a larger Enefit Green currently has a portfolio of 38 solar projects in Estonia and Poland. Image: Enefit Green. Enefit Green, the renewables subsidiary of Estonian state-owned utility Eesti Energia, is looking to procure up to 500MW of solar modules in the next three years. The company is currently EIB lends EUR31 million to Estonian renewable-energy company Sunly for a new solar park in the country, while SEB and Luminor will jointly contribute the same amount. 244 MW solar park in Risti in western Estonia to be largest photovoltaic-production (PV) site in the Baltics. Project marks Estonia added a record 513 MW of new solar capacity in 2023, bringing its total installed PV capacity to more than 1.3 GW, according to the Estonian Chamber of Renewable Energy (Eesti Taastuvenergia Koda). Estonia added 513 MW of new solar capacity in 2023, a record for a single year, according to Swedish renewables developer OX2 AB (STO:OX2) has teamed up with Finnish alternative investment fund and land manager Dasos Capital to jointly develop 10 solar projects in Estonia, starting with five totalling 500 MW. Solar panels by iamme ubeyou. The cooperation agreement will see OX2 take care of The Climate Ministry has announced plans to get to 5,600 megawatts (MW) of renewable energy capacity in Estonia by 2030, focusing on expanding wind, solar, and energy storage. The vision statement's targets include 3,000 MW of onshore wind capacity by 2030, and the plan also aims for 1,250 MW of Two Estonian PV investment plans established for Enefit Green has confirmed the final decision on the 74MW Sopi solar PV project in Estonia, into which it will invest approximately EUR44 million (US\$47 million). Estonia's Enefit Green eyes procurement of up to Enefit Green, the renewables subsidiary of Estonian state-owned utility Eesti Energia, is looking to procure up to 500MW of solar modules in the next three years. Estonia to expand solar-power production with EUR62 It will be the biggest photovoltaic (PV) production site in the Baltics with capacity of 244 megawatt peak (MWp) - enough to power more than 80,000 households in Estonia. Solar park is built together with local Estonia deploys 513 MW of solar in Estonia added 513 MW of new solar capacity in 2023, a record for a single year, according to Eesti Taastuvenergia Koda. The total significantly exceeds the 282 MW installed in 2022, OX2 forges Estonian solar partnership with 500-MW initial goalSwedish renewables developer OX2 AB (STO:OX2) has teamed up with Finnish alternative investment fund and land manager Dasos Capital to jointly develop 10 solar Estonia sets out expanded renewables, managed power visionThe Climate Ministry has announced plans to get to 5,600 megawatts (MW) of renewable energy capacity in Estonia by 2030, focusing on expanding wind, solar, and energy EBRD and EU support construction of Pihlaka KC Solar2 OX2; is 100 per cent owned by KC Energy OX2; an Estonian renewable energy developer, which owns and operates nearly 83 MW of
