How much does electricity cost in Estonia? A paid subscription is required for full access. In September, the average wholesale electricity price in Estonia amounted to 84 euros per megawatt-hour. Between January and August, electricity prices in the Baltic country increased by nearly seven-fold, reaching more than 360 euros per megawatt-hour in the latter month. Why do Estonians have electricity plans? Most Estonians have electricity plans linked to the current spot price, enabling them to respond to hourly price fluctuations and manage their consumption more efficiently. Estonia is an active participant in the European Union's electricity market. This integration is pivotal for the country's energy policy and market dynamics. Is Estonia part of Nord Pool's open electricity market? Estonia is part of Nord Pool's open electricity market together with Norway, Sweden, Finland, Denmark, Latvia and Lithuania (see map). In the open electricity market (power exchange), the price of electricity is formed as a result of supply and demand. There is at least one price area in each country, in a larger country there may be several. Is Estonia a pan-European electricity market? Estonia is part of the pan-European electricity market, where electricity trading takes place through power exchanges. The aim of the power exchange is to provide market participants trading electricity with a short-term, planned and standardised trading opportunity. What is Estonia's energy plan? Estonia aims to limit the share of oil shale in its energy mix and targets a share of at least 65% of renewables in total final consumption in 2030. Eesti Energia dominates the power sector with 85% of generation, over 95% of distribution, and around 50% of total sales. What is Estonia's energy landscape? Estonia's energy landscape is distinct, with a significant portion of its electricity generated from oil shale. This abundant natural resource has historically been the backbone of the country's energy production. While oil shale remains a major energy source, Estonia is gradually diversifying its energy mix.
