

## Finland New Energy Storage Project

---

Where is the largest battery energy storage system in Finland? SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy storage system (BESS) in Nivala Municipality, Northern Ostrobothnia. How will a new battery energy storage system help the Finnish grid? After the start of commercial operations in , the project will contribute an important balancing function to the Finnish grid, supporting the Finnish renewable energy expansion. The groundbreaking ceremony took place in the afternoon on Monday the 26th of May on the site near Nivala where the battery energy storage system will be built. Are energy storage systems a solution to Finland's energy transition? Energy storage systems offer a solution. "This groundbreaking is an important moment for Finland's energy transition and a concrete step toward a more flexible, resilient, and decarbonized energy system," said Jussi Jyrinsalo, Senior Vice President at Fingrid. When will the energy grid project start in Finland? The project proponents have confirmed that the construction works will start in March . The project, which is one of the largest of its kind in Finland, will provide grid services including frequency response and will be able to participate in energy trading on wholesale power markets. Is paistinkulma energy storage the largest battery energy storage system in Finland? Paistinkulma Energy Storage is set to become one of the largest battery energy storage systems (BESS) operating in Finland's frequency reserve market. Taaleri Energia, a Finnish-based wind and solar energy developer and fund manager, has launched its first BESS investment in Lemp&#228;&#228;l&#228;, Finland. What drives the Finnish storage market? Revenues in the Finnish storage market have largely been driven by ancillary services, primarily mFRR, aFRR, FCR-N, FCR-D, and FFR, but opportunities in energy trading are also increasing with the renewables buildout. Finland to host 240 MWh of new BESS projects Mar 11, &ensp;&#;&ensp;The project proponents have confirmed that the construction works will start in March . The project, which is one of the largest of its kind in Finland, will provide grid Groundbreaking ceremony marks commencement of one of Finland May 27, &ensp;&#;&ensp;SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy Finland's largest Battery Energy Storage System (BESS) - 3 days ago&ensp;&#;&ensp;With an installed capacity of 30 MW / 36 MWh, the project marks a major milestone and will play a vital role in strengthening Finland's evolving renewable energy infrastructure. Winda Energy, battery storage, Finland, BESS, energy storage Aug 13, &ensp;&#;&ensp;Winda Energy has announced a 30MW/60MWh battery energy storage project in Rautavaara, Finland, marking its entry into the energy storage sector with construction set for Ingrid Capacity building largest BESS in Finland Mar 5, &ensp;&#;&ensp;Sweden-headquartered BESS developer-operator Ingrid Capacity will build a 70MW/140MWh project in Finland, which it claimed will be the largest in the country. DLA Piper advise FRV on Finland battery energy storage Oct 17, &ensp;&#;&ensp;DLA Piper has advised Fotowatio Renewable Ventures (FRV), a leading company in the development of sustainable energy solutions, on the financial close of the SIMO One of Finland's largest energy
