

## Georgia Energy Storage Power Plant Dedicated

Will Georgia Power offer more battery energy storage projects? In that filing, Georgia Power signaled its intention to solicit bids for more storage- another 500 MW- in the near future. Battery energy storage projects are popping up all over the U.S., which added nearly 4 GW of storage capacity in the second quarter of this year alone, according to a recent report. What is Georgia Power's 530-megawatt battery storage system? Georgia Power breaks ground at the McGraw Ford Battery Facility in Cherokee County on April 4, . This 530-megawatt battery energy storage system will consist of two phases, approved in the Integrated Resource Plan (IRP) and IRP Update. Courtesy: Georgia Power. What is the Georgia Power Company Integrated Resource Plan Update ? Earlier this month, Georgia Power Company submitted its Integrated Resource Plan Update ( IRP Update) to the Georgia Public Service Commission, which includes an Application for Certification for four battery energy storage systems totaling 500 MW. What do we know about Georgia Power Projects? Georgia Power included attachments with information and data on each of the proposed projects, but since they contained "sensitive terms and conditions" and cost information, they were nearly entirely redacted from public disclosure- deemed "trade secrets." Here's what we do know about those projects: Where is Georgia Power's first grid-connected Bess system located? In February , Georgia Power installed its first grid-connected BESS, the Mossy Branch Energy Facility, a 65 MW system on a couple of acres of rural countryside in Talbot County, north of Columbus, GA. It was approved as part of Georgia Power's IRP. How many MW is a Bess project in Georgia? As of this week, construction on those projects is officially underway. In total, 765 megawatts (MW) worth of new BESS will be strategically located across Georgia in Bibb, Lowndes, Floyd, and Cherokee counties. Georgia Power announced that construction is underway on 765 megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd, and Cherokee counties. Peach State power play: Georgia's blueprint Jul 30, &#x2013; Georgia Power helps de-risk projects by locating BESS storage next to existing substations or retired plants. This is an intentional strategy to capitalise on existing infrastructure, alleviate common Here's where Georgia is installing 500 MW of new battery Aug 28, &#x2013; Georgia Power has applied for certification of four battery energy storage sites totaling 500 MW expected to come online in . Georgia Power commences construction of 200MW BESS Oct 21, &#x2013; Georgia Power has initiated the construction of a 200MW (megawatt) battery energy storage system (BESS) in Twiggs County, southeast of Macon in the US state. The Georgia Power Begins Construction On 765 May 8, &#x2013; Georgia Power has commenced construction on 765 megawatts (MW) of new Battery Energy Storage Systems (BESS) across Georgia, with installations underway in Bibb, Lowndes, Floyd, and Utility company announces next-gen facilities Jun 5, &#x2013; Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs. The facilities, which Construction underway on 765 MW of new May 8, &#x2013; In total, 765 megawatts (MW) worth of new BESS will be strategically located
