

## Georgia System solar Customization

Which company should I choose for solar in Georgia? Here are the top companies we recommend for solar in Georgia: Go Solar Power conducts each and every client engagement with Honesty, Integrity, Reliability, and a "Do the Right Thing" mentality. This culture of excellence permeates the actions and attitudes of our Team Members. Our parent company, Service Experts, is th

How much does a 6 kW solar system cost in Georgia? A 6 kW solar system will cost about \$13,980 in Georgia before incentives. After the 30% federal solar tax credit, this drops to \$9,786, or about \$1.63 per watt. The total cost of a solar system will vary depending on the company you choose, the size of the system, the equipment installed and how you finance it. Do you need a license to install solar panels in Georgia? In Georgia, a solar installer must be associated with a licensed electrical contractor. You can find out if an electrical contractor has the required license at the Georgia Secretary of State's website. Financing options Not everyone has thousands of dollars to spend on a solar panel installation. How much does solar cost per watt in Georgia? The cost per watt makes it easier to compare prices between quotes and gives you a better idea of how fairly the system is priced. The average price of solar is about \$1.86 to \$2.8 per watt in Georgia, so anything in that range is a fair price. Some prices may be too good to be true. Are solar incentives a good idea in Georgia? Solar incentives and rebates can cut the cost of installing solar in Georgia by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. How much sun does Georgia get a day? Georgia gets about 5 peak sun hours per day, which is sunnier than most places east of the Mississippi river, but not the sunniest in the country. That level of sun means your solar panels will produce a bit more energy here than elsewhere in the Eastern U.S., and you could charge an energy storage system faster.
