

# Home Energy Storage Implementation Plan

What is a bulk energy storage implementation plan?The Implementation Plan provides an operating framework for the program, with additional details to be provided in Bulk Energy Storage program solicitations. What is the residential energy storage program (residential program)?Residential Energy Storage Program (Residential Program) The Residential Program will be allocated \$100 million for incentives, from the \$1.2 billion program budget authorized by the Order. Does the energy storage strategic plan address new policy actions?This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of (42 U.S.C. § 17232 (b) (5)). Why did the PSC approve energy storage programs in ?The PSC's subsequent Energy Storage Order approved the energy storage programs described in the Roadmap in order to achieve a total of 4,700 megawatts ("MWs") of incremental installed capacity of energy storage spanning the bulk, retail, and residential sectors. What does the energy storage order mean for NYSERDA?The Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by and required that NYSERDA submit a draft Implementation Plan that outlines the methods and budget that could be used to achieve the bulk energy storage deployment target. How long has the PSC been working on an energy storage plan?Efforts towards a finalized implementation plan have been ongoing since June , when Governor Hochul first announced that the PSC had approved an Energy Storage Roadmap in furtherance of the state's goal to achieve six gigawatts ("GWs") of energy storage by . New York PSC approves retail and residential The New York State Public Service Commission has approved the state's retail and residential energy storage implementation PSC Approves NYSERDA's Bulk Energy Storage Program The Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by and required that NYSERDA submit a draft Energy Storage-Ready Concepts for Residential Design and This document presents guidelines and suggestions for the future adaptation of conventional electrical services in single-family homes to include Battery Energy Storage Systems (BESS), Energy Storage Strategy and Roadmap | Department of EnergyThe Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC Roadmap. Bulk Energy Storage Implementation Plan ProposalThe Implementation Plan provides an operating framework for the program, with additional details to be provided in Bulk Energy Storage program solicitations. "6 GW" Residential and Retail Energy Storage Programs NYSERDA will release a Request for Information (RFI) in March to obtain additional stakeholder input towards finalizing the Residential ISI design, with incentive launch planned for Q2 . New York PSC Approves NYSERDA's Billion Under the upcoming bulk storage incentive solicitations, energy storage developers will competitively bid in to be awarded an Index Storage Credit (ISC), which is a design modeled after NYSERDA's New York State Public Service Commission Approves the Retail The New York State Energy Research and Development Authority (NYSERDA) submitted
