

## Huawei Hungarian Energy Storage Project Company

One of Hungary's largest energy storage facilities switched on. The project's significance lies in its scale: it is currently Hungary's second-largest grid-connected battery energy storage facility, capable of contributing to domestic sustainable energy. Hungary's greatest solar energy project is currently under construction near Szolnok, with Chinese company Huawei involved in the solar energy project. The contract was signed in February, with MAVIR. MET Group inaugurates Hungary's largest battery energy storage. The latest BESS plant has a current storage capacity that would be sufficient to supply the entire decorative and public lighting needs of Budapest for 4 hours. The supplier of the largest energy storage system in Hungary has been launched. Swiss energy company MET Group has inaugurated the largest stand-alone electricity storage system in Hungary's history. The new installation, located at the Dunamenti Power Plant, MET Group unveils Hungary's largest battery storage plant. MET Group, a Switzerland-based European energy company, has inaugurated Hungary's largest standalone battery energy storage system (BESS) at the Dunamenti Power Plant. MET flips the switch on Hungary's biggest battery. With a nominal output of 40 MW and a storage capacity of 80 MWh, the facility marks the latest in a series of energy storage investments by MET Group across Europe. Huawei, CATL see Hungary as emerging green energy hub. While Huawei does not produce vehicles, the company provides batteries, intelligent software, and digital systems for global automakers. CATL, the world's largest EV battery producer, operates its largest battery storage facility. Since acquisition, the site has seen shifts towards renewables, including solar PV and batteries. MET Group said the technology for the new large-scale facility was supplied by Huawei. Officials unveil game-changing facility that could transform power. The MET Duna energy storage unit consists of 48 battery containers and 240 inverters that were manufactured by Huawei Technologies. It received over \$11 million in state funding to build the MET Group inaugurates largest BESS in Hungary. MET Group has put a 40M/80MWh BESS in Hungary into commercial operation, deployed using technology from Huawei. Hungary's greatest solar energy project is underway with Chinese company Huawei.
