

Hungary develops battery energy for communication base stations

Where is Hungary's largest battery energy storage system located? Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in Székeszhely-Zalombatta, located close to Budapest. The new facility boasts a total power output of 40 MW and a storage capacity of 80 MWh. Will Hungary's new battery energy storage system help green the grid? The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition. How does MET Group contribute to the energy transition in Hungary? On site at the Dunamenti Power Station in Székeszhely-Zalombatta, MET already installed a 4 MW / 8 MWh demonstrator plant based on Tesla Megapack 2 batteries in 2019. With this latest BESS plant which went into operation today, MET Group and the Dunamenti Power Station are further strengthening their contribution to the energy transition in Hungary. Is Hungary stocking up on battery backup? Hungary isn't alone in stocking up on battery backup as it charts its green energy path. In neighbouring Bulgaria, a massive 124 MW/496 MWh battery energy storage system went live in Lovech earlier this year. Why is battery energy storage a key element in energy transition? At the official inauguration ceremony, Péter Horváth, CEO of the Dunamenti Power Station, said: "The application of battery energy storage systems is a key element on the road to energy transition, as they allow to increase the penetration of new renewable sources into the power grid." How much money will the battery energy storage project receive? The battery energy storage project will receive a HUF 2.7bn grant from the European Union's Recovery and Resilience Facility (RRF) and HUF 5.6bn in investment incentive funds from the Ministry of Foreign Affairs and Trade, Peter Archibald Schubert, managing director of Mol Exploration and Production Hungary said. MET Group, battery storage, BESS, Dunamenti Power Station, MET Group has launched Hungary's largest battery energy storage system at the Dunamenti Power Station, a 40 MW / 80 MWh plant supporting national energy transition goals. MET Group inaugurates Hungary's largest battery. With this latest BESS plant which went into operation today, MET Group and the Dunamenti Power Station are further strengthening their contribution to the energy transition in Hungary. MET Group commissions Hungary's largest battery storage facility. Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in Székeszhely-Zalombatta, the 40 MW / 80 MWh facility marks a crucial development in Hungary's efforts to integrate renewable energy. MET Group inaugurates Hungary's biggest battery. Hungarian oil and gas company MOL has started the construction of a 20 MW / 40 MWh energy storage in Algyő (South Hungary). Hungary's largest battery storage facility comes online. Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in Székeszhely-Zalombatta, located in Hungary.
