

Battery Systems To fulfill our clients' automotive standards, our battery systems for bus applications are developed and produced in an automotive IATF 16949 compliant environment at our headquarters in Darmstadt/Germany. And Introduction to Industrial and Commercial Liquid-Cooled PCS all Our newly launched liquid cooling energy storage system represents the culmination of 15 years' expertise in lithium battery storage innovation. This liquid cooling Battery Cooling Solutions Our production is geared to quickly manufacture high volumes of quality liquid cold plates, meeting continually increasing EV demands in the regions you need them. Replicated high volume EV battery cold plate American Lithium Battery Manufacturing | Custom & ScalableWe help OEMs transition from overseas production to domestic, automated battery assembly. Our mission is to strengthen American manufacturing through scalable, high-output solutions Liquid Immersion Cooling for Battery PacksOur work has demonstrated the immense potential of immersion cooling with the fluids developed by our Research & Development teams. The fact that we have succeeded in grafting our system onto a CATL Cell Liquid Cooling Battery Energy Storage PKNERGY is a seasoned BESS designer and builder with years of experience in constructing commercial and industrial energy storage systems. We provide customers with innovative and flexible, personalized Liquid-cooled energy storage battery assembly production lineWhat is a battery assembly line? This assembly line is specifically tailored for the efficient, high-volume production of these battery packs, which are commonly used in various applications Custom Semi-Automated Lithium Battery PACK This semi-automated production line is designed for efficient and precise lithium battery PACK assembly, integrating air & liquid cooling system assembly, welding, and testing. Battery Cold Plate Solutions | XD THERMAL - XD ThermalOur 30,000+ square metre production site includes a self-owned profile extrusion line, machining center, and insulation coating line. This extensive setup empowers us to fully meet your Process cooling systems for EV battery factories: key requirementsCurrent options are diverse, and involve innovative approaches such as modular chillers for battery production factories. But what are key cooling requirements and the available options Battery Systems To fulfill our clients' automotive standards, our battery systems for bus applications are developed and produced in an automotive IATF 16949 compliant environment at our headquarters in Battery Cooling Solutions Our production is geared to quickly manufacture high volumes of quality liquid cold plates, meeting continually increasing EV demands in the regions you need them. Replicated high Liquid Immersion Cooling for Battery Packs Our work has demonstrated the immense potential of immersion cooling with the fluids developed by our Research & Development teams. The fact that we have succeeded in CATL Cell Liquid Cooling Battery Energy Storage System SeriesPKNERGY is a seasoned BESS designer and builder with years of experience in constructing commercial and industrial energy storage systems. We provide customers with innovative and Custom Semi-Automated Lithium Battery PACK Production LineThis semi-automated production line is designed for efficient and precise lithium battery PACK assembly, integrating air & liquid cooling system assembly, welding, and testing.
