

## New Zealand solar Power Station Energy Storage Project

This facility is set to enhance the country's largest thermal power complex and aims to address the variability of renewable energy sources like hydropower, wind, and solar. The project will utilize 70 Intensium Shift+ lithium-ion battery containers and is designed as a complete turnkey solution. Genesis Energy begins construction on 200MWh Construction on the Huntly BESS comes soon after Genesis Energy opened what it claims is the country's largest solar PV power plant: the 63MWp Lauriston site, located west of Christchurch on New Zealand's Ruakaka Energy Park. Ruakaka Energy Park will include a 100MW battery energy storage system, or a BESS, that'll store enough energy to power 60,000 average homes for up to two hours. We're also building a 130MW solar farm with up to Building New Zealand's battery future at Huntly In a major step forward for New Zealand's renewable energy future, Genesis Energy has commenced construction on a 100 MW / 200 MWh Battery Energy Storage System (BESS) adjacent to the iconic Huntly Power Station. Saft utility-scale BESS will power Huntly Portfolio We were impressed by Saft's competitive offer and track-record in delivering utility scale BESS projects in New Zealand. This is why we selected their BESS solution for the first phase of our Huntly Portfolio. New Zealand gives approval to 200 MWh solar-plus-storage project A 200 MWh solar plus storage farm planned for Glorit near Auckland, on the north island of New Zealand, has been granted resource consent and a notice of requirement by an Meridian Energy Completes New Zealand's First Large-Scale Meridian Energy has completed construction of New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakaka, with an official opening Genesis Energy Starts Construction of 100MW/200MWh Battery Genesis Energy, a publicly listed energy company in New Zealand, has commenced construction on a significant battery energy storage system (BESS) with a capacity of Consent granted for large solar power station at Consent has been granted for a solar power station at Ruakaka in Northland that will produce more than three times the energy of the biggest solar farm currently operating in New Zealand. Genesis Energy Chooses Saft for Major Battery Project Saft, a subsidiary of TotalEnergies, has secured a contract with Genesis Energy to supply a battery energy storage system for a 100-MW/200-MWh project at the Huntly Power Station. Meridian completes NZ's first grid-scale battery, eyes solar Meridian Energy has officially opened New Zealand's first large-scale grid battery storage system at Ruakaka, the first of its kind, and a milestone in the country's renewable Genesis Energy begins construction on 200MWh BESS in New Zealand Construction on the Huntly BESS comes soon after Genesis Energy opened what it claims is the country's largest solar PV power plant: the 63MWp Lauriston site, located west of Ruakaka Energy Park.
