Why should you buy a portable power station? Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more. What are the best portable power stations? The portable power stations that stood out above the rest were the Jackery Explorer Plus, the DJI Power , the Vtoman FlashSpeed , and the Oupes Mega 1. Portable power stations were tested for power use over time, measured in watt-hours (the total amount of energy used or produced). Are portable power stations a good investment? Portable power stations are equipped with batteries that are pre-charged with electricity before use. In contrast, gasoline generators rely on gasoline, which is burned in an engine to produce electricity. Power stations are a significant investment, but they can ultimately upgrade your camping experience to allow for power off-grid. How long does a portable power station last? A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePo4 power stations will last for more than 3,000 charge cycles, or about 10 years. Are portable power stations expensive? Updated June : We've added a Bluetti model, honorable mentions from EcoFlow and Acer, and a testing and FAQ section. Portable power stations can be very expensive, but discounts, sales, and deals are common. If you can afford to wait, you can likely get your chosen power station for less than the listed MSRP.
