

## Qatar Telecom Base Station Room Project

What are the requirements for telecom rooms within Qatar? To set up a telecom room in Qatar, there are general requirements, including detailed specifications for the Fire Alarm & Fire Fighting System and Air-conditioning System. The room shall be of a sufficient size to accommodate the proposed Telecom equipments. After a site visit, a layout drawing shall be prepared.

How to test the Q-Tel remote alarm system in Doha? To test the Q-Tel remote alarming facility in Doha, the system piping should be prepared for testing with a test pressure equivalent to 150% of the extinguishing media release pressure. The pressure test should be carried out using nitrogen gas at 25 bars for a minimum of 1.0 hour duration. (The passage does not directly answer the question about how to test the alarm system itself, but it provides the necessary steps to prepare for the test.)

What are the responsibilities of Q-Tel central OMC? The Q-Tel central OMC room at Doha has the responsibility to activate and control the automatic fire fighting and extinguishing system, provide a remote alarming facility to the central OMC room, and activate the A/C shutdown. It also controls and operates the fire fighting and extinguishing system.

How to design a telecom room? To design a telecom room, the room should be of a sufficient size to accommodate the proposed Telecom equipments. After a site visit, a layout drawing should be prepared. The room should have proper access for personnel and for shifting equipments and tools. Operation & maintenance staff shall have 24 hour access to the room.

Can a split unit be installed in a small telecom room? For a small telecom room, two wall-mounted split units of sufficient capacity can be installed instead of the floor standing type; along with a changeover panel with the same working sequence and specifications. (See attached Section 3 for detailed specifications of the Air Conditioning system).

QTEL Turnkey Project for GSM Site Acquisition & Civil Works The project consists of supply, erection and installation of various telecom structures in various Qtel locations, including Site Acquisition & Engineering Design.

Qatar Telecom (QTel) Q.S.C. : Qtel Announces Major Network The process began in July when, in response to customer requests, Qtel began installing new equipment at base stations across Qatar to improve the national mobile network.
