

How much money will Slovenia invest in transmission & distribution networks? From latest news to bespoke research - the big picture at the tip of your fingers. Slovenia's combined transmission and distribution system operator ELES said it plans to invest 5.15 billion euro (\$5.9 billion) in developing its transmission and distribution networks during the - period. Why do we need a transmission network in Slovenia? Transmission network facilities connect the production units with the distribution network and ensure a balance between the consumption and production of electric power. This is why the planned transmission lines will contribute to the improved reliability of the electricity supply in Slovenia. What are the different types of electrical networks in Slovenia? Electrical networks are classified in terms of their voltage: low-voltage, medium-voltage and high-voltage networks. The ELES Company manages the latter, the high-voltage transmission network in Slovenia. In Slovenia, the most common shapes of pylons are "fir tree", "barrel", "the Danube", the "Y-pylon" and the "H-pylon". Why are energy infrastructure projects important for Slovenia? These are energy infrastructure projects that are not only highly important for Slovenia, but also for the development of the European energy network, the establishment of the internal market of electric energy, and the realisation of the objectives of the European energy policy. Which Slovenian projects appear on the European list of common interest? The Slovenian projects that appear on the European list of projects of common interest are: 6. GreenSwitch project. 7. Cirkovce-Pince transmission line 2 x 400 kV, 8. SINCRO.GRID project. Who owns sloveniatenders? SloveniaTenders is a domain owned and maintained by TendersOnTime (TOT). TOT is in the business of wide range of online Business to Business (B2B) information services like Public procurement information, business information services; IT enabled services, E-Commerce and bid facilitation and consultancy services. Slovenia's EUR 150 million smart grid leap Jun 18, &#x2013; The five electricity distribution firms in Slovenia will invest more than EUR 150 million by the end of March in upgrading the network and the addition of smart grid components.
