Namely, from 43 EUR/MWh (lower case) to 52.5 EUR/MWh and from 47 EUR/MWh (high case) to 56.5 EUR/MWh. This is comparable with the 67 EUR/MWh LCOH for the TES with retail charges. In Spain, subsidies for storage will be granted through four calls under the PERTE ERHA1 scheme. Namely, from 43 EUR/MWh (lower case) to 52.5 EUR/MWh and from 47 EUR/MWh (high case) to 56.5 EUR/MWh. This is comparable with the 67 EUR/MWh LCOH for the TES with retail charges. In Spain, subsidies for storage will be granted through four calls under the PERTE ERHA1 scheme. In terms of the Spanish energy storage market, by the end of 2024, the total Spanish energy storage market will be about 10.8GW. The government's goal is to reach 20GW of energy storage capacity by 2026 and 30GW by 2030. According to statistics, the total installed capacity of renewable energy in Spain's rapid deployment of solar energy has created a paradoxical situation in which operational solar plants are facing low capture prices and frequent curtailments. Consequently, hybridization - i.e. combining solar assets with batteries - is becoming essential. "We're seeing many solar plant operators in Spain should prioritize investing in energy storage to prevent market volatility and balance surplus supply. With low Spanish demand levels for power and ample renewable power production, there needs to be more storage capacity to ensure negative prices are managed. RENEWABLES BOOM The Spain energy storage market size reached around 1.80 Gigawatt in 2023. The market is projected to grow at a
