

## Tajikistan Portable Power Storage Project

---

Can Tajikistan become a net energy exporter? The Government of Tajikistan aims to transform itself from a net energy importer to a net energy exporter, on the strength of its potential for hydropower and solar power production. According to the World Bank, Tajikistan's power production is 92 percent hydropower, six percent hydrocarbon, and two percent from other sources. What is Tajikistan's hydropower potential? Tajikistan's hydropower potential is estimated at 527 billion kWh per year, which exceeds the existing electricity consumption of the countries of Central Asia by 300%. The country's largest project is the Roghun Dam Hydropower Plant project, which when completed is estimated to produce Megawatts of energy. Does Tajikistan need solar power? The government is actively seeking support for development of solar power, noting that the country has an average of 300 sunny days per year, with mountain terrain unsuitable for farming allowing space for solar farms. Tajikistan is encouraging the use of electric vehicles, particularly in Dushanbe. Does Tajikistan have a power system? The existing electrical transmission and distribution systems of Tajikistan, designed in the 1970s during the Soviet era, are also being upgraded and expanded, allowing transmission of power from Tajikistan to surrounding countries. Will Tajikistan encourage electric vehicles in Dushanbe? Tajikistan is encouraging the use of electric vehicles, particularly in Dushanbe. This will require a significant increase in charging and monitoring stations. IEA: Tajikistan - Energy Sector Review A 3 MW solar power plant is being built in the Shugnan district of The power plant will include a modern energy storage system, ensuring uninterrupted power supply even at night and under variable solar insolation conditions. The Dushanbe Energy Storage Power Station: Powering Enter the Dushanbe Energy Storage Power Station - Tajikistan's \$200 million answer to energy insecurity. This lithium-ion behemoth isn't just a battery; it's the Swiss Army Poverty Reduction and Renewable Energy in By focusing on local people, especially the youth, it enables the project to be fully accepted and utilised by the locals, allowing them the skills to fix any issues, but also find good, high-quality employment that leads to Tajikistan 20kw off-grid energy storage power station photovoltaic However, for wind farms, solar PV power generation field, and other new energy-producing areas, the majority of new energy power plants do not have the conditions to establish a pumped Tajikistan energy storage project The project aims to improve the quality of life of the residents of Murgab district by providing access to sustainable and reliable sources of energy by upgrading the capacity of the existing Tajikistan energy storage solution These projects aim to address the critical power shortages in the Sughd region and the Gorno-Badakhshan Autonomous Region (GBAO), marking a transformative phase in Tajikistan's Tajikistan solar plus storage projects At request of the Tajik Ministry of Energy and Water Resources, USAID supported the installation of the solar plant in Murghob to complement the nearby 1.5 megawatt 'Tajikistan' (formerly Tajikistan grid-side energy storage project The project also includes a hybrid energy storage power plant rated for 180-kilowatt hours. The new solar plant is a direct result of successful cooperation between the Government of Energy storage power station tajikistan original ADB project approved in . The initial project provided a \$136 million grant to replace five of the Sugd region of northern
