

## Ukrainian user energy storage project

---

Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been connected by DTEK to the power grid in the Kyiv and Dnipropetrovsk regions. Collectively, they have the capacity to store 400 MWh of electricity - enough to power 600,000 Ukrainian homes for DTEK Group, in partnership with Fluence, a global market leader delivering intelligent energy storage, has energised Ukraine's largest battery-based energy storage project with a total capacity of 200 MW. Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been energised by Ukrainian private utility DTEK. DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation spans six sites ranging from 20 MW to 50 MW and connected to the power grid in the Kyiv and Dnipropetrovsk regions. DTEK's Fluence Gridstack battery units at one of six energy storage sites across Ukraine, part of the country's largest battery energy storage project announced on July 10, 2022. (DTEK press service) DTEK, Ukraine's biggest private energy company, has begun final commissioning of the country's largest battery storage project. When Russia began targeting Ukraine's power grid in 2022, it didn't just aim to disrupt electricity -- it sought to freeze the nation's will. By late 2022, 90% of DTEK's thermal power plants had been damaged or destroyed. Winter loomed. Homes went dark. Hospitals relied on generators. The country's Ukraine's 200 MW/400 MWh battery project dwarfs most Eastern European installations, and is expected to come online in October 2022, ahead of the winter. From ESS News DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites. Fluence and DTEK complete Ukraine's largest battery storage project, enhancing energy stability with a capacity of 200 MW. Fluence Energy, in partnership with DTEK Group, has successfully completed Ukraine's largest battery-based energy storage project, with a capacity of 200 MW, in under six months. DTEK and Fluence energise the largest battery storage facility in Six new battery storage systems of varying capacities - from 20 to 50 MW each - have been connected by DTEK to the power grid in the Kyiv and Dnipropetrovsk regions. Ukraine's biggest battery storage project goes online. Completed in only six months, the project was commissioned entirely remotely. Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn Ukraine. Ukraine's largest battery energy storage project DTEK, Ukraine's biggest private energy company, has begun final commissioning of the country's largest battery energy storage project, the company announced on July 10 at the Ukraine Recovery Conference. Ukraine's biggest battery storage project goes online. In just six months -- under shelling, blackouts, and wartime restrictions -- Ukraine completed Eastern Europe's largest battery storage project: 200 megawatts / 400 megawatt. Ukraine's largest battery storage project enters DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites that represents one of the biggest storage projects in the world. DTEK and Fluence Energize Ukraine's Largest Energy Storage. Built in under six months, the project is designed to stabilize Ukraine's power grid ahead of the winter season. Due to wartime restrictions, the project was commissioned in October 2022. Fluence Energizes Ukraine's Largest Battery. The energy storage systems are set to enhance grid stability and resilience in
