

Vanuatu solar Energy Storage System Project

Strategically located on Efate Island, the solar farm is equipped with 22,000 solar panels and an advanced 3.3-megawatt battery storage system, ensuring a stable and reliable power supply even during peak demand periods. The Renewable Energy Systems with Storage for Efate and Tanna (RESSET) project in Tanna, Vanuatu, was funded by New Zealand's Ministry of Foreign Affairs and Trade (MFAT). Led by a consortium of consultants, including TTA, IM3, ECA, and Scinergy Pacific, the project focused on constructing a 1.16 MWDC solar PV farm and a 0.4 MW/2.5 MWh Battery Energy Storage System (BESS). The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience.

Vanuatu has embarked on a groundbreaking journey with the launch of its largest solar farm project, the Kawene Solar Farm. This ambitious initiative is set to significantly reduce carbon emissions and bolster energy security across the island nation. Strategically located on Efate Island, the solar farm is equipped with 22,000 solar panels and an advanced 3.3-megawatt battery storage system, ensuring a stable and reliable power supply even during peak demand periods.

Union Electrique Du Vanuatu Limited (UNELCO) is set to contract the construction of a groundbreaking 3 MWp solar Photovoltaic (PV) grid-connected plant with an estimated Vatu (VT) 300 million worth of investment financed through the Port Vila Concession tariff for the period of -. This project is a public private partnership in Port Vila, Vanuatu. It comprises solar photovoltaic plants (5 MWp) with a battery energy storage system (BESS) (11.5 MW/6.75 MWh), owned by the Government, and operated and maintained by UNELCO, the private sector utility.

The installed solar PV system is a stand-alone 230/400 VAC 50Hz solar micro-grid combined with 48V battery storage. The project outputs will inform the implementation and construction phase to follow, which aims to increase the use of renewable energy in Vanuatu, reducing greenhouse gas emissions and supporting the country's commitment to sustainable development.

The New Zealand Government will take the lead in helping Vanuatu move towards 100% renewable energy by through a project called RESSET. The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience.

Project description: The project is a public private partnership in Port Vila, Vanuatu. It comprises solar photovoltaic plants (5 MWp) with a battery energy storage system (BESS) (11.5 MW/6.75 MWh), owned by the Government, and operated and maintained by UNELCO, the private sector utility.

Vanuatu solar system with lithium battery access for rural communities in Vanuatu. The installed solar PV system is a stand-alone 230/400 VAC 50Hz solar micro-grid combined with 48V battery storage.

Vanuatu has embarked on a groundbreaking journey with the launch of its largest solar farm project, the Kawene Solar Farm. This ambitious initiative is set to significantly reduce carbon emissions and bolster energy security across the island nation. Strategically located on Efate Island, the solar farm is equipped with 22,000 solar panels and an advanced 3.3-megawatt battery storage system, ensuring a stable and reliable power supply even during peak demand periods.

Largest Solar Farm in Vanuatu to be deployed in This ambitious project will be situated on the Kawene plateau in Efate, adjacent to the existing wind farm and solar facility, making it the largest solar farm in the country. The commissioning of this latest Vanuatu Renewable Energy Solar and Storage, Efate and Tanna The project outputs will inform the implementation and construction phase to follow, which aims to increase the use of renewable energy in Vanuatu, reducing greenhouse gas emissions and supporting the country's commitment to sustainable development.

NZ to Lead Renewable Energy Project on Efate The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience.
