Can solar inverters be installed on a roof? PVCA repaired these rooftop inverters damaged by heat. Luke Pollinger, president of California-based solar O& M company PVCA, said he understands it's often easier for installers to mount inverters on the roof since the equipment has increased in voltage and decreased in weight over the years. What is a rooftop solar PV system? So to accommodate these obstacles, a type of solar photovoltaic (solar PV) system had been developed which is known as rooftop solar PV systems. This is a type of solar PV system that involves the generation of electricity using solar panels mounted on the rooftops of residential, commercial or industrial buildings or structures. How do rooftop solar panels work? 2] Inverters: Rooftop solar systems are connected to either micro- inverters or string inverters. These devices convert the DC power from the panel into AC power which can be sent to the grid. 3] DC/AC wiring: These are wires which connect inter-connect panels and which connect panels to inverters. Where should a rooftop inverter be mounted? A rooftop inverter mounting project by Standard Solar. When installers choose to put inverters on the roof, the next step is finding the best possible mounting spot. When the 10-ft rule doesn't need to be followed, Standard Solar prioritizes a shaded, north-facing spot on a vertical wall or parapet. Where should string inverters be housed on commercial rooftop solar projects? The ideal place to house string inverters on commercial rooftop solar projects is indoors in a climate-controlled, locked room -- but that's not always feasible. When ground-level mounting options are scarce, installers often put these fragile power electronics on the rooftop alongside the array. Are rooftop inverters outdoor rated? A rooftop inverter mounting project by Standard Solar. "The majority of [inverters] are outdoor-rated. They've got pretty wide temperature operating windows, but I still think that electronics perform better in modified, easier temperatures," Greenfield said.
